1 Introduction

This the quality document for the punpy software package.

The statement of work for this project defines the user requirements.
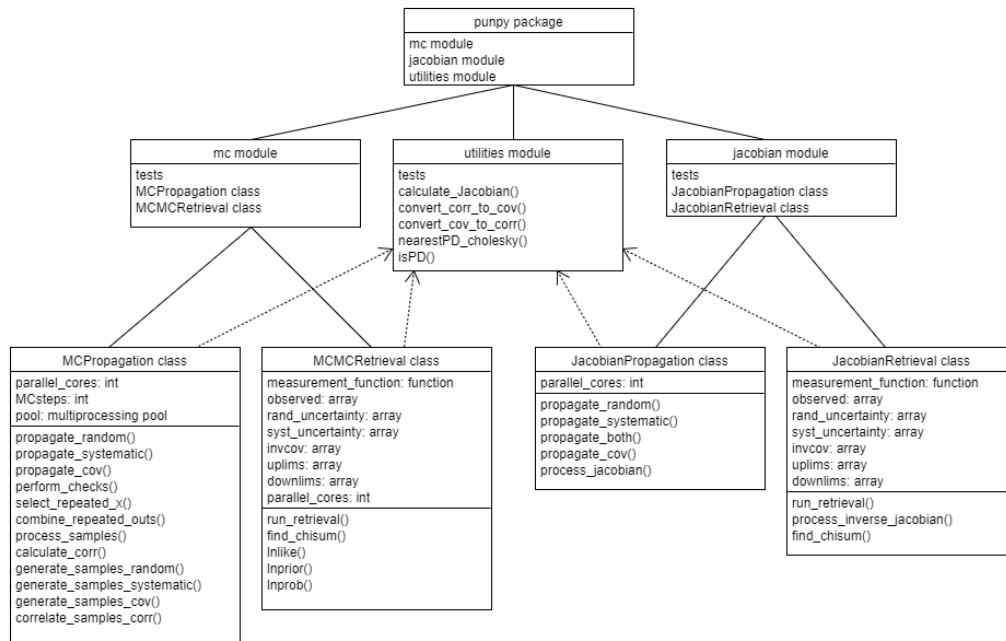

The functional requirements are included as a separate document in this folder as 'Functional_Requirements.docx'.

The software design is described in Section 2.

An automated test report is given in Section 3. This includes:

- A table detailing the environment that was used during testing.

- A summary of the results, indicating how many tests passed and how long it took.

- A table showing each of the tests that was run, how long they took, and what output was captured during testing.

- A test coverage report, showing how many lines of the software were covered by the combined tests.
